Subject: Re: LWG "areas of potential risk" layer
Date: 05/23/2007 05:24 PM

Hi Kathleen-

I was just working on this topic- attached is a zip file containing the draft areas of potential risk annotated with potential course of action. Please note that this is a draft work product (not final). If it's too large for email, give me a call and we can put it on either NOAA's or Windwards FTP site.

Best,
Ben

Hi Ben-

I'm working with John Toll to evaluate the benthic data gaps. If possible, it would helpful if you could provide the "Areas of potential benthic risk" GIS layer? This is the layer with symbology that encircles each area evaluated as a potential data gap, area of interest, no action, or unsure.

Thanks, Ben.

Kathleen
